<b>Explanations</b>	

The construction of Siro Silk Road Clean Energy Storage Technologies Battery Development and Production Campus, founded with the 50-50 JV between Farasis Energy, one of the world's leading companies in Li-ion batteries and Togg has begun in Gemlik. Battery development and production will be carried out at the campus, established in the area allocated to Siro, right next to the Togg Technology Campus in Gemlik.

Siro has already started the production of battery modules and packages at the Siro Battery Technology Center located at the Togg Technology Campus and is accelerating its production in line with Togg's needs.

Siro will continue its production at the Battery Development and Production Campus, as construction is completed by the end of 2024.

Battery cell, module and package will be developed and produced at the Siro Battery Development and Production Campus, and a production capacity of 20 GWh will be reached by 2031. The production is expected to reach over 50 GWh by 2035.

Thus 2026 is foreseen as the start of the battery cell production in addition to existing battery modules and packages production.

Alongside Togg, Siro will provide services in the fields of electric mobility, renewable energy, electric grid, charging stations and energy storage solutions to support residential needs in 120 countries.

The campus, which will be built on 607 thousand square meters, will be completed with an investment of 30 billion TL by the end of 2032 and will provide employment for 2 thousand 200 people.
