Sales Volume & Category Breakdown (1H24)

Volumes show some improvement in 2Q but still below our expectations due to economic challenges

Despite our cautious stance on price increases, RGM combined with cost control have supported our results as we have recorded margin expansion in 1H despite a strong base.

Without TAS 29, EBIT margin reached 20.4% - the highest second quarter margin of the last decade.

We're cautious for 2H on lower purchasing power expectations, limited pricing actions and thus revise our volumes and margin guidance
