

ANADOLU GROUP

## **AG ANADOLU GRUBU HOLDING A.Ş. ENVIRONMENTAL POLICY**

AG Anadolu Grubu Holding A.Ş. and all its Group companies continue their activities with the awareness of their responsibilities towards society and the environment. In line with national and international environmental rules and regulations, we aim for continuous improvement to effectively manage the environmental impact of our activities. Our efforts are guided by the ISO 14001 Environmental Management System.

In this context, as AG Anadolu Grubu Holding and Group companies:

- We comply with national and international rules and regulations regarding the environment in the regions where we do business and go beyond regulatory obligations to develop innovative practices.
- We reduce our negative impact on the environment and continuously review our environmental policy to improve our environmental performance. We ensure that our environmental policy is monitored and audited in line with our Environmental Management System.
- We measure our environmental performance through goals and targets, and report the results.
- We encourage responsible environmental management by communicating with all stakeholders and we receive their opinions about our activities in this area.
- We aim to increase the sense of responsibility by providing environmental training to our employees.
- We try to minimize greenhouse gas emissions by using energy efficiently and practice production models to support the transition to low-carbon economy in order to contribute to the fight against climate change.
- We also try to reduce air emissions other than greenhouse gases.
- We reduce waste at the source as much as possible, apply recycling techniques and provide the necessary human, technology and financing resources to dispose of waste in an environmentally friendly manner.
- We try to minimize our water usage.

- We try to minimize wastewater and improve the quality of water emissions.
- We care about preserving biodiversity.

The Sustainability Committee, which is responsible for the administration of the environmental policy, meets at least once a year and reviews, monitors and audits the environmental policy and practices. The Committee informs the Board of Directors about the process and resolutions passed.

Within the scope of our environmental policy and in line with our commitment to transparency, we share our performance with the public every year. As part of sustainability reporting, we collect stakeholders' opinions on environmental issues in our stakeholder analysis, which is carried out to determine our material issues.
