MESSAGE FROM CEO MR. BURAK BAŞARIR

As Anadolu Grubu Holding, despite the long-standing macroeconomic difficulties and decline in the purchasing power of consumers in some of the countries in which we operate, we still consistently carried our operations and managed to grow our top-line and EBITDA in the first nine months of 2024 thanks to our proactive management approach, tight balance sheet management and diversified portfolio. As a result of the policies pursued by the economy management in Türkiye, the Central Bank reserves increased, the country risk premium decreased, and foreign rating agencies continued to increase our country ratings. However, tight fiscal policy, rising interest rates, continued high inflation, the minimum wage remaining constant, and the weakness in the purchasing power of the consumer are having a direct impact on our businesses.

Looking at 9M24 results, thanks to our flexible and resilient business models, geographical and sectoral distribution, efficiency, and cost-oriented structure, we achieved a consolidated annual sales revenue growth of 3.7% while EBITDA increased by 0.2%. Our Holding net income was TL 7.4 bn in the first nine months of 2024. Excluding the impact of TAS 29, our revenues and EBITDA increased by 64.7% and 55.8%, respectively, while our net income decreased by 13.6% to TL 6.5 bn in 9M24.

If we evaluate the performance of our main operations in the soft drinks segment, despite volume pressures, we have continued to focus on maintaining affordable price points and creating quality revenue via accelerating our mix of small-packages, stills portfolio, traditional trade, and on-premise channels. Our relentless focus on quality revenue growth and cost control have both contributed to managing our soft drinks margins within an acceptable range. The beer volume performance maintained its strong momentum, and we have once again revised our beer volume guidance higher. Also, as we announced in October, we have signed a new agreement with our partner AB InBev regarding the acquisition of AB InBev's stake in the Russian business and the transfer of Anadolu Efes' interest in the Ukrainian business to AB InBev. The completion of this transaction is subject to regulatory approvals, and the business continues its operations as usual.

MESSAGE FROM CEO MR. BURAK BAŞARIR

Migros maintained strong turnover growth, market share gains, and disciplined balance sheet management. At the same time, the negative impact of the increase in personnel costs in the first half of the year on profitability eased somewhat in the third quarter of the year. The slowing domestic automotive market growth and increasing competitive conditions following last year's strong performance naturally affected the automotive segment.

The consolidated net debt/EBITDA ratio was at 0.5x at the end of 3Q24 as the Holding is successfully continuing a significant transformation on its balance sheet structure, and excluding the effect of TAS 29, our net debt/EBITDA ratio, which rose to 3.6x during 2018, has decreased to 0.4x by the end of 3Q24. Our key priorities remain successful operational performance, free cash flow generation, maintaining a tight balance sheet, proactive risk management, optimal use of idle assets, and reducing short FX positions. These priorities have strengthened our balance sheet, making it more resilient to interest rate increases and FX volatility. Consequently, the dividend payments from our group companies and the Holding have consistently increased.

As anticipated, 2024 brings numerous challenges on both the macroeconomic and geopolitical fronts. Despite these hurdles, we commit to creating value in every area we operate. We will closely monitor global uncertainties, inflationary pressures, concerns about a worldwide recession, political developments, and geopolitical risks, as these remain top priorities. We will continue to focus on maintaining strong consumer connections, operational efficiency, cost management, free cash flow generation, disciplined financial management, digitalization, and sustainability initiatives.

CONSOLIDATED FINANCIAL PERFORMANCE

AG Anadolu Grubu Holding ("Anadolu Grubu")'s consolidated revenues increased by 3.7% YoY to reach TL 412.6 bn in 9M24. Excluding the impact of TAS 29, consolidated revenues increased by 64.7% YoY to reach TL 383.5 bn in 9M24. Within our main segments, retail had the strongest performance with a 11.5% revenue growth followed by 9.6% growth in beer segment while the soft drinks segment revenues contracted by 5.1% YoY in 9M24. Auto segment revenues also declined by 15.5% YoY while Agriculture, Energy and Industry segment's revenues decreased by 3.0% YoY in 9M24.

Sum of segmental percentages may exceed 100% due to eliminations. 12-months trailing net sales breakdown and EBITDA figures.

Share of international revenues was down to 27.1% in 9M24 thanks particularly to strong performance of retail segment, and relatively stronger performance of TL. The share of International EBITDA also decreased to 52.2% as a result of improved margins in domestic soft drinks operations and higher due date expenses in the food retail segment. The share of international net income increased to 41.9% due to lower monetary gains which has an impact on our domestic financials.

Consolidated EBITDA increased by 0.2% YoY to TL 45.3 bn in 9M24 as increasing cost pressure in beer segment, economies of scale impact in soft drinks segment, lower demand and increase in competition in the auto sector was offset by high imputed interest expenses on term purchases on Migros as a result of rising interest rates which positively impacts Migros' Gross and EBITDA margins. Excluding the impact of TAS 29, Consolidated EBITDA increased by 55.8% YoY to TL 56.8 bn in 9M24. Soft Drinks, Beer and Retail' share in total EBITDA were 50%, 27% and 21% respectively in 9M24 while auto, agriculture energy & industry and other segments had a combined share of 3% in total EBITDA mix during this period.

The group recorded TL 7.4 bn net profit in 9M24. Excluding the impact of TAS 29, net profit in was at TL 6.5 bn. The decline in net profit is primarily attributable to retail, beer, auto segments, to the rise in financing costs with the changes in interest policy in Türkiye as well as lower monetary gains. The breakdown of net profit by segment was Beer 30%, Soft Drinks 40%, Retail 22%, Auto 7%, and Agriculture energy & industry 1%.

Despite the uncertainties in consumer environment, volatility in commodity prices and uncertainties in geopolitics, we have managed to continue our growth and keep our lower leverage ratios under control in 9M24 on the back of conservative and proactive balance sheet management, focus on FCF, utilization of idle assets, efficient and disciplined working capital management.

Focus on free cash flow, financing in local currency and active use of derivative instruments in order to minimize the foreign currency risks on debt and lowering short FX positions particularly at the Holding and Migros, on our other Group companies still remain our key priorities.

Consolidated net debt/EBITDA ratio slightly decreased to 0.5x at the end of 3Q24 from 0.6x at the end of 2023. The Holding is successfully continuing a major transformation on its balance sheet structure, and excluding the effect of TAS 29, despite the rise in dividend payments, our net debt/EBITDA ratio, which rose to 3.6x during 2018, has decreased to 0.4x by the end of 3Q24.

Retail segment as for a long period of time remains in net cash position. Beer segment also turned into net cash position as of 3Q24 and remains in net cash position. Soft drinks segment net debt to EBITDA was 1.0x at 3Q24 while auto segment net debt to EBITDA was at 4.0x at 3Q24. Lastly, net debt to EBITDA at Agriculture, Energy and Industrial segment was 9.1x at 3Q24. Despite rising dividend payments to our shareholders our leverage ratios remain under control.

As of 3Q24, 62% of our consolidated debt is short term and 38% is long term. Average duration of our consolidated debt is 32 months. (29 months at 2023, 40 months at 2022, 34 months at 2021)

In this period Migros signed an agreement to sell 100% shares as well as liabilities of its subsidiary Ramstore Kazakhstan LLC ("Ramstore Kazakhstan"), which previously divested food retail operations in Kazakhstan and continues its operations solely with the management of a shopping mall in Almaty, for approximately USD 34.5 million to TOO Evrazia Almaty. Within the scope of the agreements coming into force, the collection of the said amounts has been completed on July 23, 2024. This decision, which has been taken in line with Migros' long-term strategies, will contribute to the Company's profitable and sustainable growth targets in its domestic operations.

Also as we have announced in October, we have signed a new agreement with our partner AB InBev regarding the acquisition of AB InBev's stake in the Russian business and the transfer of Anadolu Efes' interest in the Ukrainian business to AB InBev. The completion of this transaction is subject to regulatory approvals, and the business continues its operations as usual.

Our efforts continues within both Holding and the group companies in line with the strategy of deleveraging the businesses through cash flows and focus on our core business. We will continue to add value in every field in which we operate and continue with our investments that will support our long-term growth. Our priorities will continue to be preserving close ties with the consumers, operational efficiency, managing costs, free cash flow, disciplined financial management, digitalization and sustainability efforts.

Beer group's consolidated volume continued to deliver robust performance in the third quarter, consistent with the momentum seen in the first two quarters. Growth was supported by strong performance in Russia, Georgia and Moldova while there was some slowdown observed in Türkiye; as expected. As a result, beer group volume achieved a 5.7% increase in 3Q24. This solid growth momentum led to beer group sales volume to reach 29.8 mhl in 9M2024, reflecting a year-on-year growth of 8.0%. International beer operations' consolidated sales volume reached 9.0 mhl in 3Q24, representing a 7.5% increase compared to 3Q23. This brought 9M24 volumes to 24.9 mhl, marking another strong growth of 9.1% versus the previous year. After two consecutive quarters of strong growth, Türkiye beer experienced a 1.4% decline in 3Q24, primarily due to weakened consumer purchasing power, as no minimum wage increase was implemented in the second half of the year

Beer Group's sales revenue increased by 27.4% reaching TL 25,1 billion in 3Q24. International beer operation's revenue was recorded at TL 17,1 billion, growing by 39.6%. This growth was primarily driven by Russia, where Russian beer operations benefited from volume expansion, price increases, together with favorable product mix. Meanwhile, the CIS operations also contributed to growth through the implementation of effective pricing strategies and marketing activities. During this period, sales revenue in Türkiye beer registered a growth of 6.4% to TL 7,9 billion in 3Q24. Growth was driven by price adjustments introduced at the beginning of July, leading to enhanced revenue per hectoliter performance compared to the previous quarter, though growth moderated slightly due to accelerated discounts as a result of stiff competition. Thus, beer group delivered revenue growth across all operations, reaching total revenue TL 70.0 billion in 9M24, representing a 9.6% increase. Excluding the impact of TAS 29, beer group recorded revenue of TL 68,9 billion in 9M24, registering a robust growth of 66.6%.

Beer Group's EBITDA (BNRI) increased by 1.4%. to TL 5,2 billion, though margin contracted by 539 bps to 21.0% in 3Q24; mainly due to Türkiye operations. CIS operations achieved margin expansion, supported by robust top line growth along with controlled OPEX spending. In Russia, while the OPEX / sales ratio increased year-over-year, improved commercial performance, a favorable sales mix, and effective management of transportation costs helped moderate the decline in EBITDA margin compared to previous quarters. Meanwhile, in Türkiye, margin contraction was recorded, driven by weaker gross profitability along with higher OPEX spendings resulting from increased trade marketing expenditures during the high season. The decline was further impacted by the high base effect from the previous year. All in all, beer group EBITDA (BNRI) reached TL 11,3 billion implying a margin of 16.2% in 9M24. Excluding the impact of TAS 29, EBITDA (BNRI) margin contracted by 364 bps to 19.1% in 9M24.

Beer Group's net income was recorded at TL 3,0 billion in 3Q24 compared to TL 8,3 billion in the same period of the prior year. The decrease was primarily driven by lower monetary gains in the period compared to the previous year, despite an increase in net financial income. Therefore, beer group net income was recorded at TL 7,6 billion in 9M2024. Excluding the impact of TAS 29, beer group net income would be TL 6,1 billion for the same period.

Beer Group generated TL 4,3 billion Free Cash Flow in 3Q24 which is substantially higher compared to TL 2,1 billion a year ago. As a result of the strong cash generation in the 9M24, beer group achieved a net cash position of TL 4.2 billion as of September 30, 2024.

CCI's consolidated volume in 3Q24 was down by 9.2% vs last year, reaching 438 million unit cases ("uc") bringing 9M24 volumes to 1,2 billion unit cases ("uc") down by 4.1%. The macroeconomic hardship impacted our operations in Türkiye and Pakistan mostly, where we have recorded 12.2% and 22.9% y/y volume decline in 3Q24. In the remainder of CCI's international operations, the company recorded 1.3% y/y volume growth in 3Q24. In Türkiye, lack of minimum wage adjustments, weakening consumer purchasing power, slowdown in new the number of tourists arriving Türkiye, lingering geopolitical issues in the Middle-East have resulted with a 12.2% y/y volume decline to 176 million uc in 3Q24.

The net sales revenue ("NSR") in 3Q24, decreased by 9.3% year-over-year and recorded as 36.7 billion TL. Excluding the impact of inflation accounting, NSR and NSR/uc growth were 24.8% and 37.4% respectively mainly thanks to effective revenue growth management actions. Consequently, NSR/uc in dollar terms reached \$2.70 – the highest among the third quarters of the last decade, implying a growth of 9.9% y/y. Türkiye recorded 18.3% NSR decline in 3Q24, while effective mix management initiatives paved the way for i) the growth of both IC package share and traditional channel share, and ii) category diversification with increased presence of the stills category. Without TAS 29 adjustments, NSR in Türkiye grew by 29.4% and NSR/uc realized as TL101.2 with 47.4% y/y improvement. In the international operations, NSR grew by 2.3% y/y, while NSR/uc posted 10.1% y/y growth. Without the impact of TAS 29, NSR increase was 21.5% y/y and NSR/uc improvement was 30.7% y/y. Due to the macroeconomic challenges, price increases were either delayed or limited in certain markets. Nevertheless, international operations delivered \$2.5 NSR/uc – up by 4.6% vs same period last year before TAS 29.

Proactive and successful cost management in Türkiye supported the gross margin positively, while the deliberate choice of prudent price adjustments in the international operations has impacted the gross margin in the international business. Accordingly, Türkiye recorded 550 bps y/y gross margin improvement in 3Q24, while international operations delivered 266 bps y/y contraction. All in all, consolidated gross margin is realized as 36.4% with 129 bps y/y expansion in 3Q24 while gross margin in 9M24 was at 36.1% with 290 bps y/y expansion.

The EBITDA margin improved by 10 bps to 21.4% in 3Q24, as the FX gain/losses related to trade activities are excluded in EBITDA vs EBIT and in 3Q24, FX gain stood higher vs 3Q23.

Net profit is recorded as 5.2 billion TL in 3Q24. Excluding the TAS 29 accounting, net profit grew by 2.1% in TL terms, reaching 4.4 billion TL.

The free cash flow ("FCF") was (1.9) billion TL in 9M24 vs 4.0 billion TL of 9M23. As a bottler with the privilege of significant growth headroom and considering the low per capita Non-Alcoholic-Ready-to-Drink ("NARTD") beverage consumption in our operating geographies, we continue to invest ahead of demand and become future-ready with our production capacity. In line with this strategy, two greenfield investments and line investments have been completed during the year and our capital expenditures/NSR increased to 8.7% from 6.2% a year ago in 9M24 period.

Net sales revenues of the segment increased by 12.3% YoY in 3Q24 to reach TL 74.4 bn bringing 9M24 revenue growth to 11.5% with total net sales revenues of TL 206.3bn. Excluding the impact of TAS 29, net sales revenues of the segment increased by 82,0% YoY to reach 185.7bn in 9M24. While online sales supported the growth in turnover, the competitive pricing strategy in all categories also resulted with a higher market share. Migros continued its efforts to improve the omni-channel shopping experience.

Online sales remained strong in 9M24 and its share in total revenues was 18.2% (excl. alcohol, tobacco). Migros is now better equipped to meet a potential sudden increase in demand on the back of higher capacity and wider of coverage of its internet sales. The stores covering online operations increased to 1,289 as of 9M24. Total number of stores increased by 345 compared to the same period of last year to reach 3,550 stores at 9M24.

Gross profit increased by 31.5% YoY in 9M24 to reach TL 46.5 bn, implying a gross profit margin of 22.5%. Migros also generated TL 9,8bn EBITDA in 9M24, with an EBITDA margin of 4.7%. Excluding the impact of TAS 29, EBITDA was up by 143% YoY to reach 16.9bn in 9M24.

Despite the negative impact of inventory inflation adjustment, high imputed interest expenses on term purchases were effective in the increase in EBITDA margin. On the other hand, the inflationary pressure on operational expenses mainly due to personnel costs in 1H24 started to be balanced as of Q3 2024. Migros has a net cash position as of 9M24. Migros has a net cash/EBITDA ratio of 0.4x as of 1H24.

Net Income in 9M24 was down by 49,6% YoY to reach 5.5bn due to due to rise in personnel expenses, in interest rates and lower monetary gains. Excluding the impact of TAS 29, Net Income increased by 12.8% YoY in 9M24. On the other hand, in 9M24, Migros maintained its strong cash flow performance and recorded 13.2bn FCF, in line with the previous year.
