The main components of Group's restatement for the purpose of financial reporting in hyperinflationary economies are as follows:

- The consolidated financial statements for the current period presented in TRL are expressed in terms of the purchasing power at the balance sheet date and the amounts for the previous reporting periods are restated in accordance with the purchasing power at the end of the reporting period.
- Monetary assets and liabilities are not restated as they are currently expressed in terms of the purchasing power at the reporting period. Where the inflation-adjusted amounts of non-monetary items exceed the recoverable amount or net realizable value, the provisions of TAS 36 and TAS 2 have been applied, respectively.
- Non-monetary assets, liabilities and equity items that are not expressed in the current purchasing power at the reporting period are restated by applying the relevant conversion factors.
- All items in the statement of comprehensive income, except for the effects of non-monetary items in the statement of financial position on the statement of comprehensive income, have been restated by applying the multipliers calculated over the periods in which the income and expense accounts were initially recognized in the financial statements.
- The effect of inflation on the Group's net monetary asset position in the current period is recognized in the consolidated statement of profit or loss in the net monetary position gains (losses) account.
- The financial statements of subsidiaries, joint ventures, and associates operating in foreign countries have been prepared by applying the necessary adjustments and classifications in accordance with the Turkish Financial Reporting Standards (TFRS) issued by the Public Oversight Accounting and Auditing Standards Authority ("POA") to ensure proper presentation. The assets and liabilities of the foreign subsidiaries are translated into Turkish Lira using the exchange rate at the balance sheet date, while income and expenses are translated into Turkish Lira using the average exchange rate. Income and expenses are restated in accordance with the purchasing power at the end of the current period. Exchange rate differences arising from the use of closing exchange rate and average exchange rate are recognized under the currency translation differences item under equity.

Seasonality of Operations

Due to higher consumption of beverage during the summer season, the interim condensed consolidated financial statements of Anadolu Efes, a subsidiary of the Group, may include the effects of the seasonal variations. Therefore, the results of Beer and Soft Drinks segment for the first three months up to March 31, 2026 may not necessarily constitute an indicator for the results to be expected for the overall fiscal year.

Adel, a subsidiary of the Group, starts sales campaigns for specific products at the beginning of each year and then carries out 'dealer fairs' for the sales of the brands produced and imported in the first quarter of the year. At these sales campaigns and dealer fairs, cheques, direct billing system DBS and credit card are received in the amount of orders from the customers and the received orders are met in the first half of the year.

NOTE 4 - SEGMENT REPORTING

The management monitors the operating results of its six business units separately for the purpose of making decisions about the resource allocation and performance assessment. The six operating segments are: Beer, Soft-drinks, Retail, Automotive (including passenger vehicles, commercial vehicles, boat, generator, spare and component parts, motor vehicle renting); Agriculture, Energy and Industry (agriculture, stationery, production and sale of electricity and real estate) and Other (information technologies, trade).

Since segment reporting and information used in the Group management reporting is consistent with consolidated statement of financial position and consolidated statement of profit or loss the Group does not need to perform reconciliation between the consolidated statement of profit or loss, consolidated statement of financial position and the segment reporting disclosure.

EBITDA is not an accounting measure under TFRS accounting and does not have a standard calculation method however it has been considered as the optimum indicator for the evaluation of the performance of the operating segments by considering the comparability with the entities in the same business.

NOTE 21 - TAX ASSETS AND LIABILITIES

The Group is subject to taxation in accordance with the tax procedures and the legislation effective in the countries in which the Group companies operate.

The corporate tax rate for the fiscal year is 25% in Türkiye. Corporate tax returns are required to be filed until the twenty-fifth of the fourth month following the balance sheet date and paid in one installment until the end of the related month. The tax legislation provides for a provisional tax to be calculated and paid based on earnings generated for each quarter. The amounts thus calculated and paid are offset against the final corporate tax liability for the fiscal year.

In Türkiye, with the law titled “Law on the Introduction of Additional Motor Vehicle Tax to Compensate for the Economic Losses Caused by the Earthquakes on February 6, 2023, and on the Amendment of Some Laws and Decree Law No. 375” published in the Official Gazette dated July 15, 2023, and numbered 32249, the Corporate Tax rate increased from 20% to 25%. The corporate tax rate in Türkiye is 25% as of March 31, 2026.

According to the Turkish Tax Law, corporate tax losses can be carried forward for a maximum period of five years following the year in which the losses were incurred. The tax authorities can inspect tax returns and the related accounting records for a retrospective maximum period of five years. In Türkiye, the tax legislation does not permit to file a consolidated tax return. Therefore, provision for taxes, as reflected in the interim condensed consolidated financial statements, has been calculated on a separate-entity basis.

Tax Advantages Obtained Under the Investment Incentive System:

The Group's earnings from investments tied to an incentive certificate are subject to corporate tax at discounted rates, starting from the accounting period in which the investment is partially or fully operational, until the investment contribution amount is reached. In this context, tax advantage amounting to TRL 2.234.817 (December 31, 2025: TRL 2.188.420) that the Group's will benefit from in the foreseeable future as of March 31, 2026 is reflected in the consolidated financial statements as a deferred tax asset. As a result of the recognition of the said tax advantage as of March 31, 2026, deferred tax income amounting to TRL 46.397 has been realized in the consolidated profit or loss statement for January 1- March 31, 2026. According to the incentive certificates summarized above, there is no current period corporate tax provision (March 31, 2025: None) through using incentive certificates' tax advantage and this amount has been deducted from the deferred tax asset.

The Group capitalizes the R&D expenditures it has made in its statutory books. The Group makes calculations over the R&D expenditures in accordance within the framework of the relevant legislation and take benefits from the R&D discount according to law's permission. As of March 31, 2026, Group took advantage of R&D deduction amounting to TRL 18.709 in the current period corporate tax provision (March 31, 2025: TRL 281.218). As of March 31, 2026, the Group has utilized TRL 427.095 in future R&D deduction advantages recognized as deferred tax assets in the financial statements (December 31, 2025: TRL 265.625). As a result of the recognition of the said tax advantage, deferred tax income amounting to TRL 161.470 has been realized in the consolidated profit or loss statement for January 1 - March 31, 2026 period.

(Amounts expressed in thousands of TRL based on the purchasing power of Turkish Lira (“TRL”) as of March 31, 2026, unless otherwise stated)

NOTE 21 - TAX ASSETS AND LIABILITIES (cont’d)

Tax Advantages Obtained Under the Investment Incentive System (cont’d):

Deferred tax assets are recognized when it is determined that taxable income is likely to occur in the coming years. In cases where taxable income is likely to occur, deferred tax assets are calculated over deductible temporary differences, tax losses and tax advantages vested in indefinite-lived investment incentives that allow reduced corporate tax payments. In this context, the Group's bases the reflection of deferred tax assets arising from investment incentives in the consolidated financial statements on long-term plans and evaluates the recoverability of deferred tax assets related to these investment incentives as of each balance sheet date, based on business models that include taxable profit estimations. It is foreseen that the deferred tax assets in question will be recovered within 5 years from the balance sheet date.

In the sensitivity analysis carried out as of March 31, 2026, when the inputs in the basic macroeconomic and sectoral assumptions that make up the business plans are increased/decreased by 10%, the recovery period of deferred tax assets regarding investment incentives, which is foreseen as 5 years, has not changed.

NOTE 23 - NATURE AND LEVEL OF RISKS ARISING FROM FINANCIAL INSTRUMENTS

Financial Risk Management Objectives and Policies

General

The Group’s principal financial instruments comprise bank borrowings, finance leases, and cash and short-term deposits. The main purpose of these financial instruments is to raise finance for the Group’s operations. The Group has various other financial instruments such as trade debtors and trade creditors, which arise directly from its operations.

The main risks arising from the Group’s financial instruments are foreign currency risk, interest rate risk, price risk, credit risk and liquidity risk. The Group manages these risks as stated below. The Group also monitors the market price risk arising from all financial instruments.

Foreign currency risk

Foreign currency risk arises from the EUR and USD denominated assets and liabilities of the Group. The Group has transactional currency exposures. Such exposures arise from sales or purchases or borrowings by the Group in currencies other than the Group’s functional currency. The Group manages foreign currency risk by using natural hedges that arise from offsetting foreign currency denominated assets and liabilities. Foreign currency liability consists of mainly long term liabilities. Accordingly, in the short term foreign currency risk that may arise from fluctuation of foreign currencies are relatively limited. The Group also conducts foreign exchange forward transactions and cross currency swap transactions in order to avoid foreign exchange risk as denoted in Note 24.

NOTE 23 - NATURE AND LEVEL OF RISKS ARISING FROM FINANCIAL INSTRUMENTS (cont’d)

Financial Risk Management Objectives and Policies (cont’d)

Foreign Currency Risk (cont’d)

Foreign Currency Hedge of Net Investments in Foreign Operations

Anadolu Efes, the subsidiary of the Group has designated an instrument which is amounting to USD 500 Million out of USD 500 Million bond issued as of June 29, 2021 to hedge its foreign currency risk arising from the translation of net assets of its subsidiary located in Netherlands, Efes Breweries International (whose main activity is facilitating foreign investments in breweries).

CCI, the subsidiary of the Group, has designated two instruments, the first one amounting to USD 65,4 Million bank loan drawn on April 24, 2024, and the second one amounting to USD 500 million out of USD 500 Million bond issued as of January 20, 2022, as a hedging instrument in order to hedge its foreign currency risk arising from the translation of net investments of its subsidiary located in Netherlands, CCI Holland and Waha B.V.

The effective part of the change in the value of the bonds and loans designated as hedging of net investments amounting to TRL1.695.134 (TRL 1.271.351- including deferred tax effect) is recognized as “Gains (Losses) on Hedge” under Equity and to “Other Comprehensive Income (Loss) Related with Hedges of Net Investment in Foreign Operations” under Other Comprehensive Income (March 31, 2025: TRL 3.581.015 (TRL 2.685.776- including deferred tax effect)).

Capital Risk Management

The Group’s objectives when managing capital are to safeguard the Group’s ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. Regarding capital risk management the Group follows net financial debt/equity ratio. Net financial debt is calculated by subtracting cash and cash equivalents and short term financial investments from total financial debt.

NOTE 24 - FINANCIAL INSTRUMENTS

24.1 Fair Value

Fair value is the amount for which an asset could be exchanged, or a liability settled between knowledgeable, willing parties in an arm's length transaction. The optimum fair value of a financial instrument is the quoted market value, if any.

The financial assets and liabilities which are denominated in foreign currencies are evaluated by the foreign exchange rates prevailing on the date of balance sheet which is approximate to market rates. The following methods and assumptions were used to estimate the fair value of each class of financial instrument of the Group for which it is practicable to estimate a fair value:

a) Financial Assets

The fair values of certain financial assets carried at cost in the consolidated financial statements, including cash and cash equivalents plus the respective accrued interest and other financial assets are considered to approximate their respective carrying values due to their short-term nature and negligible credit losses. The carrying value of trade receivables along with the related allowance for unearned income and uncollectability are estimated to be their fair values.

NOTE 24 - FINANCIAL INSTRUMENTS (cont’d)

24.1 Fair Value (cont’d)

b) Financial liabilities

Trade payables and other monetary liabilities are considered to approximate their respective carrying values due to their short-term nature. The bank borrowings are stated at their amortized costs and transaction costs are included in the initial measurement of loans and bank borrowings. The fair value of bank borrowings are considered to state their respective carrying values since the interest rate applied to bank loans and borrowings are updated periodically by the lender to reflect active market price quotations. The carrying value of trade payables along with the related allowance for unrealized cost is estimated to be their fair values.

24.2 Derivative Financial Instruments and Hedge Accounting

Derivative financial instruments are initially recognized at cost and subsequently valued at fair value.

The Group documented the relationship between hedging instruments and hedged items at the beginning of the hedge transaction and also documented risk management objectives and the strategy for performing a variety of hedging transactions. Group, both at the beginning of the process of hedging transaction and on a regular basis of the hedging transaction, documented the assessment whether instruments used in hedging transactions are effective in high-level balancing changes in values of hedged items.
